

Ideation Phase

Brainstorm & Idea Prioritization

Date	13 Feb 2026
Team ID	LTVIP2026TMIDS73343
Project Name	Heart Disease Analysis
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization:

Step: Brainstorm, Idea Listing and Grouping

2

Brainstorm
Write down any ideas that come to mind that address your problem statement.
 10 minutes

TIP
You can set a sticky note color to make it easier to see different topics. (eg. a how to one passish, a particular color)

Person 1

Lifestyle Visuals:
Use charts to show how BMI and Smoking directly impact heart health.

Age-Based Analysis:
Compare heart disease risks across different age groups.

Web Access:
Build a website using **Flask** so the dashboard can be opened in any browser.

3

Group ideas
Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.
 20 minutes

TIP
Add a sentence-like label to each cluster. If label for a cluster is getting too big use, break to into smaller clusters.

Focused on interactive stories, heat maps, and risk-factor charts.

Step: Idea Prioritization

2

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

TIP

Participants can use this space to rank their ideas on a scale of importance. Place an idea in the grid by dragging it to the right spot.

Importance

How often do the ideas that we are working on impact our efforts to what we are doing?

+

-

Great for identifying high-risk zones but needs more data cleaning

Essential for the "Web Integration" portion of your project.

Required for your "Data Visualization" phase grade.
